CATALOG

*Automatic Lens Groover*  
**NH-800AT**

*Viewlight features a durable and high density automatic lens groover NH-800AT designed to reshape eyeglasses frames, any plastic, glass, or polycarbonate materials.*

*Features:*

- Non corrosive machine body
- Suitable for plastic and glass lens
- Adjustable groover position (front-central-rear)
- Accurate on all profiles
- Adjustable groover depth from 0 to 0.7mm
- Precise control

*Automatic Polisher*  
**NH-900**

*Viewlight offers a smooth and high density automatic lens polisher equipment NH-900 designed to polish and reshape eyeglasses frames or any polycarbonate materials.*

*Features:*

- Exquisite exterior and mechanical capacity
- Suitable for CR-39, plexiglass & optical lenses
- Two pieces of IC plates attached
- Automatic timing
- Powerful motor and limited noise
- Precise control

*Hand Edger Grinder*  
**NH-35**

*Viewlight features a durable and high density abrasion wheel hand edger grinder NH-35 designed to reshape eyeglasses. This optical manual lens grinder has a stylish convex design, compact frame and sturdy support.*

*Features:*

- Original external shape
- Excellent water-proof capacity
- Drainage system
- Reversible rotation controlled by button
- High density abrasion
- Fine and smooth wheel grinds lens

Lens Drilling  
**NH-3**

*Viewlight displays a durable and high quality opposite taper lens drilling system NH-3, which precisely drills holes avoiding any chipping or breakage within the any lenses.*

*Features:*

- Ideal for drilling holes in glass and plastic lenses
- Opposing taper drills bits system
- Drills holes from both sides simultaneously
- Precision placement
- Avoidance of chipping and breaking of all lenses
- Adjustable lens support arm

Electronic Heater  
**RB-202A**

*Viewlight features a user friendly and high-quality digital heater RB-202A, which permits a forced air ventilation, changing the desired power with the insertion of one or two resistances and soften celluloid frames and other similar materials.*

*Features:*

- Maintains a constant temperature
- Reduces heat exposure time
- Heat thermostat for security propose
- Two heat settings and one cool setting
- Separate cooling and cool air settings
- Heat resistant plastic vents concentrator
- Incorporates safety thermal cut-out switch
- Desired power switch

Electronic Heater  
**NH-320**

*Viewlight offers a user friendly and high quality digital frame electronic heater NH-320, features a hot air blower used to soften celluloid frames and other similar materials.*

*Features:*

- Temperature control system
- Heat collecting device
- Quality plastic beaker
- Cold and heat switches

*Ultrasonic Cleaner*  
**CD-4820**

*Viewlight features a digital safety ultrasonic cleaner CD-2800 designed ideally to clean lenses and other optical parts through its high frequency sound and works with or without heat and features a clear-view window so you can see its cleaning power in action.*

*Features:*

- Five preset cycles
- High power - 160 watts
- Heated water function
- Hardware, small metal parts, and jewelry
- Cleaning cycles with LED readouts
- Easy to read digital timer

*UV Detector*  
**VL-51101-4**

*Viewlight displays a advanced and high quality UV detector VL-51101-4 which measures the visible wavelength of UV display lens setting through anti-radiation testing position and display light.*

*Features:*

- Ultraviolet Rays
- Cutting Indicator light
- Red light-general optical lens
- Green light E.M.I coating optical lens

*UV Detector*  
**NH-518**

*Viewlight features a high quality UV detector NH-518 which measures the visible wavelength of UV display lens setting through anti radiation testing position and display light.*

*Features:*

- Anti-radiation display light
- Anti-radiation testing position
- Anti-UV rays shading monitor
- Anti-UV optical lens detector
- Auto counterfeit money detector
- Anti-radiation monitor
