Filter Insertion Control + Lever

The optical filters devices controllers can selectively transform light of different wavelengths used in many applications. Available Filters: Blue, Red, Gray, Green (Red free).

Lightning Card Red LED Reflex

SL-9900 ZOOM slit lamps are built with a tilting device where the diagonal light sources can be vertically projected up to 20° with 5° intervals. This shows to be very helpful in the horizontal optical observation gonioscopy & posterior eye examination.
