## *Excellent* IMAGE QUALITY

Viewlight's sophisticated slit lamp has multiple continuous and revolving drum magnification changers, giving a clear, brilliant and well contrasted images thanks to the multi-layer anti reflection treatment.

## *Slit Lamps* Magnifications

	TYPE	MAGN. CHANGER	MAGNIFICATION	EYEPIECE	FIELD VIEW	PUPIL RANGE	DIOPTER
CSL .7U	Galilean Stereoscope	Revolving Drum	3 Step Magnification	12.5x	10x, 16x, 25x	55-78mm	±6D
CSL .8U	Galilean Stereoscope	Revolving Drum	5 Steps Magnification	12.5x	10x	55-75mm	±6D
CSL .10U	Galilean & Parallel Type	Revolving Drum	5 Steps Magnification	12.5x	6x, 10x, 16x, 25x, 40x	55-82mm	±7D
CSL .11U	Converging Stereoscope	2 Steps - Alt. Objective Lens	2 Steps Magnification	10x	10x & 16x	50-82mm	± 5D

## *Alternate Objective Lens* 10x | 16x

These sophisticated lens allows the operator to easily maneuver between high and low magnifications using a two-position of magnification.

# Cross Slide + Capture Joysticks

Viewlight USA slit lamps, are built with a precise, smooth and high quality joystick. It provides lateral, longitudinal and vertical movements during all patients examinations.

# Smooth & Control Mechanics

All Viewlight's joystick can also be rotated to lower or elevate the light beam. The locking screw located at the base secures the slit lamp from movement when it is not in use.

	FRONT & BACK	LEFT & RIGHT	FINE MOVEMENT	VERTICAL
CSL .7U	90mm	100mm	15mm	30mm
CSL .8U	90mm	100mm	15mm	30mm
CSL .10U	90mm	100mm	15mm	30mm
CSL .11U	90mm	100mm	15mm	30mm

# Precise & Quality Adjusters

Viewlight's high quality optics and precise mechanical parts are feasible for all adjustable slit positions designed for comfort and a new experience while capturing and recording the patients eyes.

## Slit Lamp Filters

Inami's Slit Lamps Illumination features a built-in yellow filter for clearer view and energy saving light source generating no UV and less heat.

Heat Absorption

Cobalt Blue

Red-Free

Grey

## Illumination System

Viewlight's slit lamps offers a powerful illumination system with either Halogen or LED light bulbs for optimum color rendition and continuous illumination control. It provides a steady 50,000 hours of working lighting time observation,

	TYPE	MAGN. CHANGER	MAGNIFICATION	EYEPIECE	FIELD VIEW	PUPIL RANGE	DIOPTER
CSL .7U	Galilean Stereoscope	Revolving Drum	3 Step Magnification	12.5x	10x, 16x, 25x	55-78mm	±6D
CSL .8U	Galilean Stereoscope	Revolving Drum	5 Steps Magnification	12.5x	10x	55-75mm	±6D
CSL .10U	Galilean & Parallel Type	Revolving Drum	5 Steps Magnification	12.5x	6x, 10x, 16x, 25x, 40x	55-82mm	±7D
CSL .11U	Converging Stereoscope	2 Steps - Alt. Objective Lens	2 Steps Magnification	10x	10x & 16x	50-82mm	± 5D

## ***Short and Long Reflectors***

Normally most of our slit lamps includes one to two reflectors. One is long and the other is short. We usually use the long reflector. When the included angle between the lighting component, the microscope is between 3 degree and 10 degree, the image may be obstructed. Then you can use the short reflector.

## ***Halogen & LED Illumination***

Showcases the aperture slit height & four filter dial selections. Halogen bulbs are easily to be installed and removed with no hesitations.

## ***HAAG STREIT Type Illumination***

Viewlight slit lamp offers an halogen or LED illumination lamp designed for accurate and detailed observations.

## Slit Lamp Chinrest

All patient positioning frame consist of two upright metal rods to which are attached a forehead strap and a chin rest. Viewlight's chinrest height can be adjusted with the knob side knobs.

## Chinrest Paper

When the paper needs replenished, pull upwards on the two fixing pins of the chin rest and replace with a new package of paper. Then secure the fixing pins again.

## Fixation Target

Viewlight's offers two different fixation targets, available with the diopter adjustment target and the illuminated fixation spot.

## Tonometer TU-100

Tonometer TU-100 provides extreme measurement accuracy and the value is directly readable on the instrument, without any standardization and calibration difficulties. **Range: 0~10.6Kpa**

## Tonometer RU-900

VL-PCLSUTM

This applanation tonometer is designed to function as an integral part of the Haag-Streit type slit lamps. **Range: 0 - 80 mm Hg**

VL-PCLSUTM

## Tonometer RU-100

Viewlight's tonometer RU-100 is an important instrument to measure the intraocular pressure. **Range: 0~10.6Kpa**

# IMAX-5

## IMAGING SYSTEM

The IMAX-5 is a compact and light 5 megapixel digital camera with accurate and intelligent exposure.

## Digital Camera Compatibility

Widely compatible to different brand model slit lamps. CSL 11U is the ideal and highly recommended slit lamp for the IMAX-5.

## Smart Auto Exposure Wireless Button

2.4Hz wireless solution, no aiming, fast reaction, and stable performance. 3V Energizer Battery Not Included

## User Friendly Interface USB Transfer

IMAX-5 has a simple design style and friendly interface help operators handle it quickly and efficiently. Includes a professional centralized management software and integrated printing functions.

## Digital Adaptor VL-Z8

Slit lamps are designed to incorporate optional accessories such as the digital adaptor VL-Z8, in order to mount the optional stylish Canon professional camera Version T5- T8.

## Digital Adaptor VL-Z5

This horizontal beam splitter dual port camera adaptor VL-Z5, is a perfect assembly for all Viewlight, Zeiss, Inami, and Topcon slit lamps.

## Built-in Adaptor CSL-8U

The CSL-8U has a built-in beam splitter, includes a digital photo adaptor, and a 12.4 megapixel CANON camera to capture images of the anterior, posterior segment: cornea, sclera, iris, lens and retina.

## ***Electrical Tables*** **1x Device**

This sturdy and secured instrument table features an adjustable height sequence designed for 1 optical instrument configurations.

## ***Electrical Tables*** **2x Device**

Viewlight's two device table top station are designed with a rugged construction and simplicity, providing a peace of mind knowing your instruments are secured on a stable platform

## Product Introduction

## Portable Slit Lamps

# PSL1

**PSL1** high luminance LED lighting system is light weight by design and enables inspection at the patient's comfort level.

**PSL1** is a rechargeable 704V 680mAh battery, which operates with over two hours of continuous illumination usage.

**PSL1** enables you to optically change the pupil adjustment from 50 -75mm at eye piece 10x and 55- 70mm at eye piece 16x.

**PSL1** offer a dioptre adjustment for ocular and focus matching. The forehead rest spring is designed for comfort.

**VIEWLIGHT**

## Portable Slit Lamp PSL1

### Microscope

Eyeiece	10x and 16x
Objective Lens	1x
Total Magnification	10x and 16x
Diopter Adjustment	±5D
Visual Field	10mm
Pupil Distance Adjustment	50-75mm(at eyepiece 10X) 55-70mm(at eyepiece 16X)
Working Distance (WD)	80mm

### Illumination

Slit Width	0-Ø10mm
Slit Width	Ø1mm, Ø3mm, Ø5mm, Ø10mm
Filter	Heat-Absorption, cobalt blue, Red-free
Illumination Angle	On the level circumference 30 degree
Light Source	High brightness white LED

### General

Dimensions	159mm (W) x 107mm (D) x 231mm (H)
Weight	700g
Battery Type	Rechargeable lithium-ion battery
Rated Capacity	7.4V/680mAh
Operation Time	2 hours (full charge with maximum illumination)
Battery Rated Input	AC 100-240V 50/60Hz
Charging Output	DC 804V/600mA
Electric Shock Protection Type	Internal Battery Type
Electric Shock Protection Degree	Type B

LENSMETER

**DLR-800**

  
**ANDROID**  
SYSTEMS

# AUTO FOCUS LENS READER

## Optical Intelligence

The NEW DLR-800 is the most accurate digital lensmeter on market today under the hartmann principle. Measures refractive and prism power of the lens of eyeglasses and contact lenses.

## Centering Diagram

The DLR-800 features a flexible adjustable lens reader (without the use of ABBE number) with a centering indicator, showcased by diagram marks on the screen to adjust the optical center of lens.

# AUTOMATIC

## Measurement Range

Viewlights's latest digital lensmeter DLR-800 technology serves a wide measurement range (-25D ~ +25D) automatically measure most refraction, astigmatism, prism, progressive bifocal, trifocal, hard and soft contact lenses.

1

7"

## LCD Touch Screen Monitor

The DLR-800 features a 7 inch LCD touch monitor display with full touch panel, designed to view till 110° for user convenience. This HD liquid crystal monitor on which can show the measured data and PD of left and right eyes.

### FEATURES:

1. Lens Table Adjuster
2. 110° Tilt Screen
3. Lens Table Knob
4. Thermal Printer
5. Lens Markers

5

4

Vision Range  
Detector

## UV & Blue Light

DLR-800 specialized interface measurements and penetration ratio simply and accurately by easy operations and shows a result in the range of 0% to 100% for a various lenses including sunglasses.

## Precise Reading

# DETECTORS

DLR-800 has a built-in accurate lens detectors readers with a wide measurements of double (triple) vision lens and optical center markers for precise reading. (ink cartridge included). It allows noticeable icons and intuitive familiar GUI for an efficient and flexible operations.

## Auto Identification

- Dioptic Profile
- UV Readings
- PD Meter Measurement
- Prism Lens Measurement
- Progressive lens measurement
- Normal lens measurement

## USER FRIENDLY INTERFACE

The NEW DLR-800 interface showcases the ability to modify the systems parameter, change any measurement modes, auto saved measuring and printing out all data.

### High Speed Printer

All PD measurements Lensmeters built-in high-speed thermal printer, auto memory data saving and replaceable printing paper (included)

## DLR-800 - Power Supply

- 8. ON / OFF Switch
- 9. Main Power Outlet
- 10. Computer Connection Port
- 11. USB Connection Port
- 12. Device Serial Number

## Product Overview:

- 1. 7" LCD Touch Screen
- 2. Lens Fixing Frame
- 3. Side Nose Pad Frame
- 4. Lens Base
- 5. Point Button
- 6. Lens Table & Indicator
- 7. Memory Switch

# TECHNICAL PARAMETERS

## Included

- Lensmeter - 1 unit
- Print Paper - 1 roll
- Inkpad Oil - 1 Box
- Dust Cover- 1 Piece
- Power Cable- 1 Piece

## Range Measurements

- Sphere Power: 0.00D- +25.00D (VD 12mm)
- Increment: 0.01/0.06/0/12/0/25D
- Cylinder Power: (CYL) 0.00~±10.00D
- Increment: 0.01/0.06/0/12/0/25D From: +, ±, -
- Axis for astigmatism: 0° - 180° (1° STEPS)
- Additional Power: 0.00~+10.00D
- Increment: 0.01/0.06/0/12/0/25D
- Prism Power: 0.00△-10.00△
- Increment: (0.01/0.12/0.25)cm/m
- Prism Basal Angle 0°to 360°
- Lens Size: Φ7 ~110mm
- Lens Thickness: ≤20mm
- Lens leg thickness: 0~158mm
- Range of PD: 30~100mm
- Range of PH: 4~55mm
- Pupil Distance: 10~80MM
- Speed Measurement: 0.2 second
- Lens Diameter: 18 to 110mm
- Lens Type: Single lens / Bifocal lens  
Three focal lens / Progressive

## Other

- Data Out: RS-232C, USB
- Internal Printer: Thermal Printer
- Display: 7.0" LCD Touchscreen Monitor
- Resolution: 1024 x 600
- Permanent Shock: 10g / 6ms
- Oscillate (Sine Curve): 10Hz ~ 500Hz, 0.5g
- Power Supply: AC100~220V 25VA
- Power Consumption: 45 ~ 65VA
- Dimensions (w) x (d) x (h): 255mm x 212mm x 473mm
- Weight: 5.10Kg

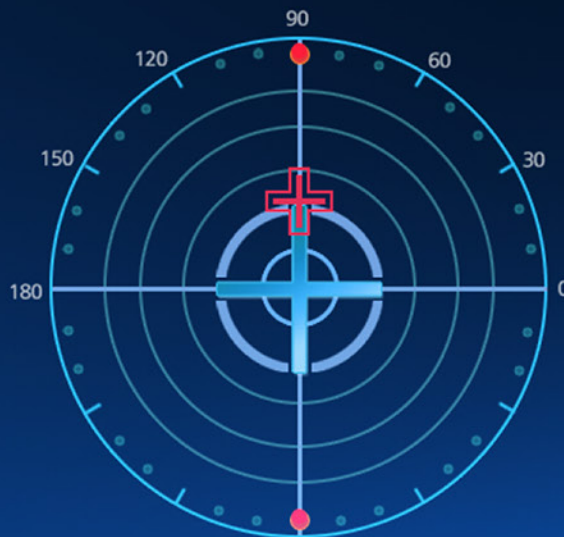

*New* **DIGITAL**  
**LENSMETER**  
**ULM-900**

## About ULM-900

The NEW digital lensmeter ULM-900 is designed to measure refractive power and prism power of a lens of eyeglasses and contact lenses, to orientate and mark uncut lenses, and to verify the correct mounting of lenses in glasses frames.

## Automatic Detection

A single vision lens or Progressive lens could be detected automatically and switched quickly to corresponding measurement mode to measure various lenses without adjusting ABBE number.

## PD & UV Measurements

Digital lensmeter ULM-900 serves a wide measurement range (-25D ~ +25D) automatically measure most refraction, astigmatism, prism, progressive bifocal, trifocal, hard and soft contact lenses.

## Accurate Range

UV & Blue light measurement and penetration ratio could be measured simply and accurately by easy operations and shows a result in the range of 0% to 100% for a various lenses including sunglasses.

## Lens Detectors

ULM-900 has a built-in accurate lens detectors readers with a wide measurements of double (triple) vision lens and optical center markers for precise reading.  
(ink cartridge included)

## Ergonomic Design

The ULM-900 features 110° tilted full 7 inch LCD touch monitor display with full-color touch panel, designed to view till 110° for user convenience. It allows noticeable icons and Intuitive and familiar GUI provide an efficient operation without a specialized knowledge.

Flexible adjustable lens reader (without the use ABBE number) can show the centering by diagram marks on the screen and it can help to adjust the optical center of lens quickly.

110°

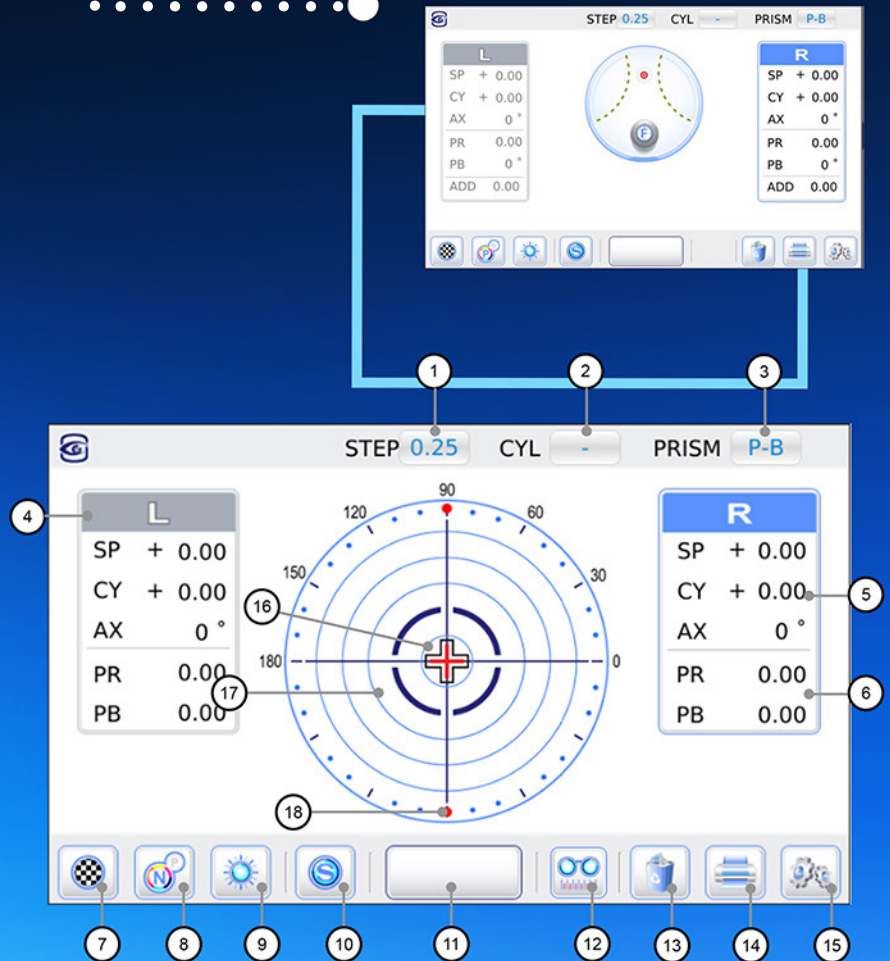

## Measurement Interface

The ULM-900 interface showcases the ability to modify the systems parameter to change any measurement modes, auto saved measuring and printing out all data.

## Thermal Printer

All PD measurements Lensmeters built-in high-speed thermal printer, auto memory data saving and replaceable printing paper (included)

- (1) Indication step
- (2) CYL mode
- (3) Prism mode
- (4) Value Window
- (5) SPH power
- (6) Prism power
- (7) Check pattern screen
- (8) Normal/Progressive mode
- (9) UV/BL measurement mode
- (10) Single lens button
- (11) Measurement button
- (12) PD measurement screen
- (13) Initializing button
- (14) Print button
- (15) SETUP mode button
- (16) Prism position
- (17) Prism concentric circle
- (18) Axis mark

**URK-700A**

# Product Specifications

## About URK-700A

URK-700A features measurement data and various functional program show in color thru a high clear and precise 7 inch Touch Wide LCD Screen. URK-700A covers a wide measurement range, from -25D to +22D.

- 1. Head Rest
- 2. Measurement Window
- 3. Chin Rest
- 4. Chin Adjuster Lever
- 5. Touch Screen Monitor
- 6. Auto Saver / Printer
- 7. Measurement Button
- 8. Stage Holding Knob
- 9. Joystick

## Ergonomic **DESIGN**

## Automatic Chinrest

URK-700A provides user-friendly environment by adopting smooth curved shape chin rest adjustment height lever to place the patients chin.

Not only the usual refractometry and keratometry, but also corneal diameter and base curve of contact lens can be measured with this one instrument.

URK-700A's measurements of eye, prescriptions for glasses and contact lenses can be made more efficiently.

## Model Eye

URK-700A offers a ocular imaging eye model which incorporates an anterior chamber, crystalline lens, and fundus. Model provides superior demonstration and training of common ophthalmic imaging devices.

# Data Center

## Auto Save / Printer

All **URK-700A** test result are transferred to it's built-in high-speed thermal printer, auto memory data saving and replaceable printing paper. (included)

## Communication Interface

- Effective Management of Measurement Data
- Support Various Mode of Measurements
- VD (Vertex Distance) results
- Displays SPH, CYL., AXIS, R1, R2, A2
- Illumination Sensor
- Convenient PD Measurement (Pupil Distance)
- Automatic Chinrest with Adjusting Mechanism
- Multi Levels Locking System

### Refractometry

• Vertex Distance(VD)	0.0 , 10.0, 12.0, 13.5, 15.0mm	
• Sphere(SPH)	-25.00 ~ +22D (VD 12mm)	Unit : 0.12 / 0.25 D
• Cylinder(CYL) Axis(AX)	0.00~±10.00D	Unit : 0.12 / 0.25 D
• Cylinder form	1~180	Unit : 1
• Pupil Distance(PD)	-, +, MIX	
• Minimum Pupil	10~85mm	
• Diameter	Ø 2.0mm	

### Keratometer

• Radius of Curvature	5.0~10.2mm	Unit : 0.01mm
• Corneal Power	33.00~67.50D	Unit : 0.12/ 0.25 D
• Corneal Astigmatism	0.00~-15.00D	Unit : 0.12/ 0.25 D
• Axis	1~180	Unit : 1
• Corneal Diameter	2.0~12.00mm	Unit : 0.01mm

### Other:

• Storage Memory	10 measurement each eyes
• Internal Printer	Thermal printer
• Display	7.0 inch TFT COLOR LCD Monitor, Touch
• Chin rest movement	Max 65mm
• Power supply	AC100V ~ 240V, 50/60Hz
• Power consumption	60 - 90VA
• Dimension	248mm(W) x 476mm(D) x 473mm(H)
• Weight	21kg

**NEW**  
*Auto Refractor & Keratometer*  
**URK-800A**

Sold ONLY in Latan Market

## PRODUCT URK-800A

The *Smart* autorefractor keratometer URK-800A is the new generation of ophthalmic equipment featuring an illumination sensor, focusing navigator, multilevel dial types, extremely rapid automatic measurements and highly accurate data.

## EASY CONNECTION

## WITH OTHER DEVICES

## DIOPTRIC MEASUREMENTS

URK-800A covers a wide measurement range, from -25D to +22D, even an examinee with strong myopia can be measured.

## DISTANCE CONTROL

Safe patient environment  
(follow COVID-19 regulations)  
wear a face mask while operating  
and in direct contact between  
the patient or the operator  
and third person.

## ILLUMINATION SYSTEM

Features a well developed illumination system able to observe eye condition of the cataract or contact lens surface. It is able to save 2 images of each eye and continuous observation.

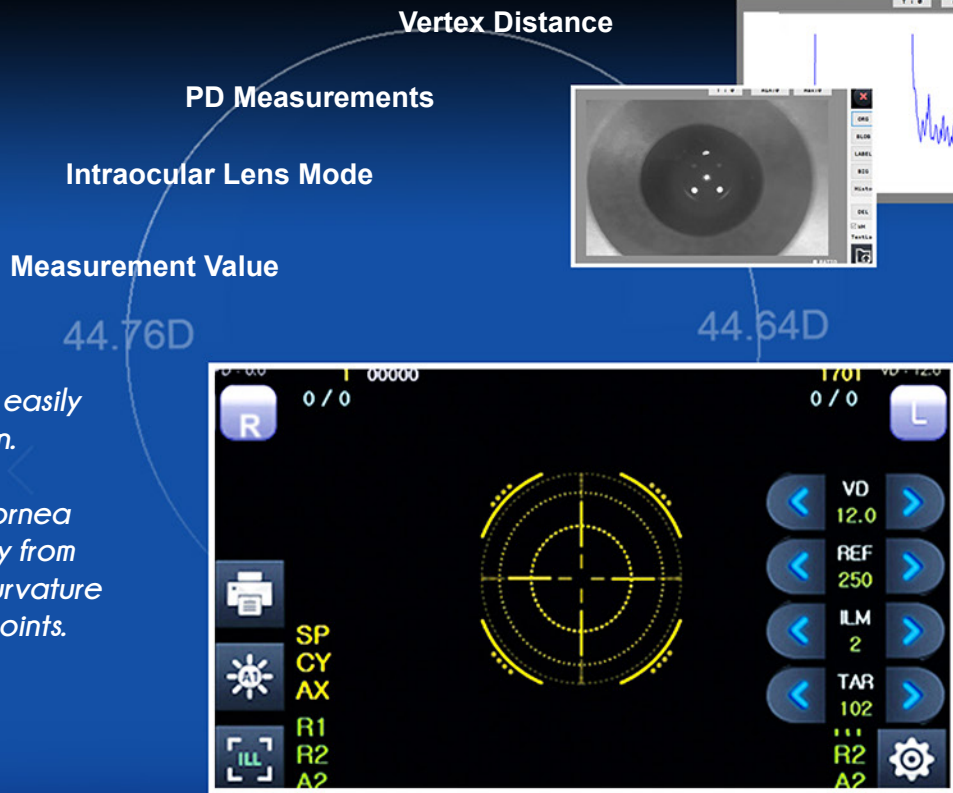

# URK-800A

AUTO REFRACTOR  
& KERATOMETER

## Convenient User MENU SETTING

The operator may alter set-up easily  
and faster by an unique design.

It may measure periphery of cornea  
both horizontally and vertically from  
the center of cornea to get curvature  
and eccentricity value of all points.  
It may allow the best fitting for  
contact lenses.

Retina illumination

## Built-in TECHNOLOGY

Measured  
RESULTS

Recognizing of measurement  
MODE, DATE, AVERAGE VALUE

## PRINTER

Quick and Automatic

The printing paper with data is cut  
automatically with high speed.

## OTHER FEATURES

URK-800A measure the periphery  
of cornea both horizontally and  
vertically from the center of cornea  
to get curvature and eccentricity  
value of all points. It may allow the  
best fitting for contact lenses.

---

## Monocular PD measurement

It supports short distance PD (45 ~ 75mm) and short distance work (35 ~ 70cm) to make a reliable near-distance Convergence Test.

---

## Accurate Measurements

Lens operation is speedy, and consecutive operation of jog shuttle does not skip any data, allowing more accurate and prompt vision test possible.

---

## Auto-Shielding Functions

To minimize interruption for control power, an auto-shielding function works, when a lens more than  $\pm 0.5D$  operates.

## Product Overview

Ensures faster restarting time, faster lens change and a reduced operating noise.

1. Horizontal Controller
2. Forehead Prop
3. Face Protector
4. Test Window
5. Lever
6. Near Vision Vision Chart Bar
7. Forehead Fixing Dial VD Control Dial
8. VD Test Window

## Near-Distance Vision Chart

Offers a distance visual acuity chart to measurement your degree of vision loss. Simply insert the vision chart bar to the UDR-800, while testing the smallest object that you can recognize.

## 8" Touch screen LCD Monitor

8" TFT COLOR LCD features high-definition clear UI and various image for each function. Also improves data recognition for accurate visual test.

## Short Key and Simplified Buttons

UDR-800 navigation buttons are minimized to 26 buttons designed to operate the necessary functions by means of Dials on Operation panel, Key pad button and the buttons on touch screen. Features a Locking system function, Prismoff, Auxoff function, External data representation and Touch masking function.

1. 8" Touch Screen (High Resolution)
2. Menu and Print Selections
3. Binocular Eye selection measurements
4. Jog Dial (Change the lenses value)
5. Masking Functions (Visual Chart)
6. RS-232 Port
7. USB Port

## Convenient Output

UDR-800 monitors assist all files through USB port transfer and fast real-time guide. Also, this device includes a embedded printer, where you can print all your test result.

240°

## Tilting & Reversal Monitor

LCD monitor offers an advanced mobility system to accomodate all enduser with a reverse functions and can be used either by tilting or swiveling up to 240°.

## Data Transmission

UDR-800 monitor inputs all eye-test information without lens operation, and offers PRESET function that put in the lenses at once.

## Unit Test

- UDR-800 supports **30 system unit tests** in total.
  - Near Vision Acuity With Addition
  - Near Point Of Convergence Test
  - Near Point Of Accommodation Test
  - Near Point Addition Test Using Cross Grid
  - Negative Relative Accommodation Test
  - Positive Relative Accommodation Test
  - Negative Relative Convergence Test
  - Positive Relative Convergence Test
  - Test Of Cylinder Power
  - Test Of Cylinder Axis
  - Red/Green Test
  - Cross Cylinder Test-power Test
  - Cross Cylinder Test-axis Test
  - Cross Grid Test (Ver2.00 And Over)
  - Horizontal Maddox Rod Test
  - Vertical Maddox Rod Test
  - Binocular Balance Test At Polarized Light Duochrome Balance
  - Worth 4 Dots
  - Schober Horizontal and Vertical Test
  - Horizontal and Vertical Coincidence(Aniseikonia)
  - Horizontal and Vertical Phoria Test Without Fixation
  - Minute Stereo : Minute Stereo Acuity Test
  - Horizontal and Vertical Von Graefe Test

# Networking System

UDR-800 could be connected with 20 competitor's products. Features a built-in Interface with Lensmeter Ref/Keratometer, Chart Projector, and LCD Projectors.

1. Ref / Keratometer Terminal
2. Operation Monitor Terminal
3. ACP-700 Terminal
4. URK-800 Terminal
5. Others Instrument Terminal
6. AC Power | Fuse (250 V)

# NEW CHART & PROJECTOR ACP-900

## Streamlined Shape Design

With its attractive streamline design, the ACP-900 is guaranteed to fit in within any practice.

1. Projection lens / Focusing wheel

2. Receiving window

3. Table stand

4. Pilot Lamp

5. Power On/Off Switch

6. AC Power Inlet

7. Fuse Holder

8. Angle Adjuster

9. RS-232 Port

## Three Dimensional Alignment

The ACP-900 projector is optimized when the projection screen is angled to direct light to the patient's head. Place a mirror on the screen. The light should project where the patient's head would be.

## Refraction Distance

Position the instrument at the same distance from the screen to the patient within the range between 2m and 7m. To obtain longer refracting distances in small rooms, a mirror or systems of mirrors can be displayed. In this case, a high quality front surface mirror is required.

## Remote control

ACP-900 Features a wireless control interactive iOS applications to control the functions for the chart system.

## Specifications

1. Inflated ray transmitter

2. Letters chart

3. Number chart

4. Snellen chart

5. Program

6. Lamp ON/OFF

7. Vertical, horizontal line, single Letter Masking

8. Children chart

9. Landolt chart

10. Function chart

11. Red/Green Test

12. Direction

## About ACP-900

Viewlight's auto chart projector **ACP-900** is the most advanced measuring visual acuity in the market. Features 41 different charts including red/green and polarized filters for the eye optometry.

## LED Light Source

ACP-900's advance acuity chart projector is used for displaying letters or icons onto the wall for patients to read. Viewlight USA features a semi-permanent lifetime LED light source that's brighter and clearer than conventional bulb light.

# LCD Series

## Remote Control

LCD series chart & projector includes a compact, easy remote control, displaying the charts in the palm of your hand. LCD remotes connects via Wifi, eliminating the line-of-site and or out-of range limitations of other systems.

## Features:

- **LCD-2400** has the patent of 24-inch digital chart and it gives the widest measurement range for patients and variable charts with accurate result. System runs with Windows CE 6.0 OS.
- **Random Function:** Its random function helps examiners to diagnose the patients, it also maximize the precise testing result by automatically changing numbers and letters on the chart.
- **Contrast Sensitivity Adjustment:** LCD-2400 system helps examiners to do the visual acuity test for Cataract patients by using contrast sensitivity adjustment. It can be adjusted 6 steps (100% → 50% → 25% → 12% → 6% → 3%) or it also can be chosen 1%
- **R/G Filter for Color Depth Adjustment:** LCD-2400 system enables a user to adjust to R/G filter concentration from the 0 to the 256 steps. It applies to all kinds of R/G chart Program Mode.
- **Astigmatism Axis Adjustment Function:** LCD-2400 system's adjusting astigmatism axis function gives convenient environment to diagnose astigmatism test.

LCD-3200 is the visual acuity chart system run by WINDOW CE 6.0 OS. Its chart can be easily changed by simple remote control.

Color Anomaly Charts are designed to test your color-blindness and color weakness.

ETDRS - Early Treatment Diabetic Retinopathy Study. Contrast sensitivity testing with normative data using letters, patented bullseye or linear patterns.

Astigmatic Test measures 7 kinds of clocks dials rotating step by step by using the up/down remote features.

LCD 3200 system has extensive animation functions which stimulate the children to concentrate during the test. The children chart consist of multiple traditional figures.

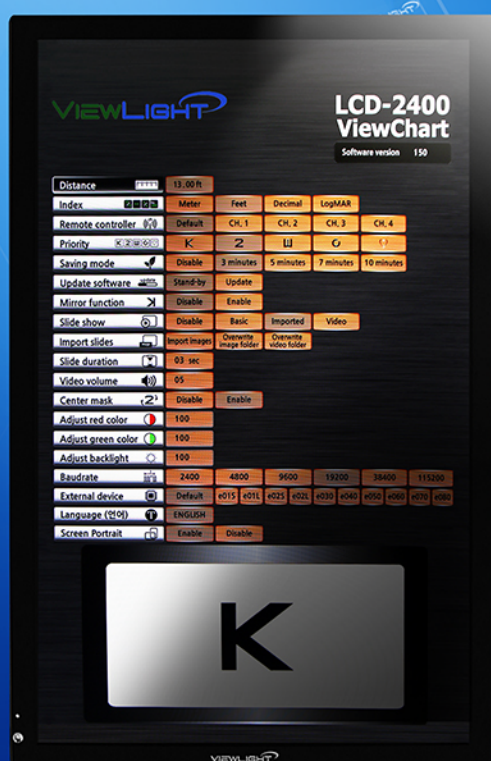

LCD-3200 system's adjusting astigmatism axis function gives convenient environment to diagnose astigmatism test.

Black/White Reverse function helps people, with lasik or cataract surgery, to easily recognize optotypes.

Phoria Test determines the patients eye focus near objects. Phoria usually occurs when binocular viewing is broken.

RETI  VIEW

## Portable Retinal Camera

*Viewlight USA is proud to introduce the new hand held fundus camera Reti View, an applied android system for easier operation, even without ophthalmology background.*

### Slim Body Wide Vision

- HD touch screen
- High Definition 16 megapixel camera
- Manual / Auto Focus System
- Super Large Touch Screen
- Cloud Service System
- Low light LED Flash 480 x 800
- Auto focus 8 internal targets fixation
- Non-mydratic, minimum pupil size 2.5mm

## Intelligent & Advanced Fundus Screening

*Reti View is the most convenient method to supply all professional diagnosis for community screening and to realize effective mass screening.*

*The Reti View features a non-mydratic and low LED flash, designed for accurate and detailed observations. It can capture quality images for minimum pupil size at 2.5mm; combined with AI smart and remote screening functions.*

## Android System Application

- One hand operation with Android system
- Support data storage, reading, wireless transfer, wireless printing
- DICOM interface
- Work independently without additional computer or mobile device
- Integrated design only 560g

## Ophthalmic Application

- Ophthalmology Clinic
- Internal Medicine
- Optical Center
- General Eye Clinic
- Physical Examination,
- Animal Hospital / Clinical Research
- Consultation / Charity
- Gynecology Hospital
- Basic Screening / Tele Medicine

# PEAK

## REFRACTION UNIT

The refraction unit Peak chair and stand is a new type of product that brings in advanced design and manufacturing technology abroad, taking the simple, fashion, practical as starting point. PIKE ophthalmic units can hold up two instruments on their rotating table tops. Their one touch control panels facilitate easy operation.

## Features:

1. Projector Support
2. Column with LED Lamp
3. Phoropter Arm (Optional)
4. Hand instruments support
5. Two Working Station Table
6. Digital Control Panel
7. Tool Storage
8. Base Plate with Plastic Cover
9. Device Light Intensity Adjustment
10. Lamp Light Intensity Adjustment
11. Auxiliary ON / OFF
12. Unit ON / OFF
13. UP / DOWN Chair Movement
14. Anterior / Posterior Base Movement
15. Projector Turn ON / OFF
16. Lock / Unlock Table

## Accessories

- Counter Balanced Phoropter Arm
- Rod for Slit Lamp
- Chin Rest Adapters
- Hand Instruments Recharge or Feeding
- Fixed Monitor Support
- Adjustable Monitor Support
- Extra Spotlight

## Specifications:

- **Dimensions:** Min 430mm | Max: 620mm
- **Width:** 600mm
- **Depth:** 750mm
- **Weight:** 80 kg
- **Max Capacity:** 135 kg
- **Power Supply Voltage:** 230Vac - 50Hz
- **Current Absorbed:** 400 w
- **Main Fuses:** 2x T5A 250V for 230V

## Overview:

1. Counter Headrest
2. Fixed Backrest
3. Reclineable Armrest
4. Rotation Handle
5. Up and Down Switch
6. Reclinable Footrest
7. Base Plate with Plastic Cover

# PEAK

## EXAMINATION CHAIR

Viewlight USA displays a **NEW** modern and advanced examination chair PEAK, offers a detailed adjustable armrests, recline bar for easy rotation, reclineable footrest, comfortable upholstery padded materials for patient comfort.

## Examination Unit Edge

- Luxurious Italian design
- The EDGE ophthalmic unit can hold up two instruments on the rotating table top
- Full one touch buttons control it is an easy task to adjust the height of the chair and the unit
- Automatic height adjusting system
- Wheelchair access

## Examination Unit Classic

- Firm, light and handy structure
- Comfortable & Convenient Armrest
- Motorized examination chair
- Refined and modern appearance
- Special surface spray coating technology
- Rotation Angle  $\pm 30^\circ$
- Table Size: 840 mm x 405 mm

## Examination Unit Pure

- Digital control panel and hand instruments support
- Luxurious Oversized Headrest
- Comfortable & Convenient Armrest
- Manual pneumatic assisted tilt recline examination chair
- Workable table voltage: 200W

## Examination Unit Opera

- Luxurious Oversized Headrest
- Comfortable & Convenient Armrest
- Maximum Recline Control - 40
- Manual pneumatic assisted tilt recline z chair
- CSA, C/US Certificate of Compliance

## Examination Unit Mozart

- Motorized Recline and Incline Chair
- Adjustable & Positioning Worktable
- Mozart holds up to 265 lbs and seat raises 31.55" x 19.75
- Features a contemporary motorized up & down elevation motor
- Adjustable headrest
- Manual recline system and a comfortable upholstered armrest
- Special surface spray coating technology

## Examination Unit Allegro

- Luxurious Oversized Headrest
- Comfortable & Convenient Armrest
- Maximum Recline Control - 40
- Manual pneumatic assisted tilt recline examination chair
- CSA, C/US Certificate of Compliance

Maximum Interval Lens Frames	200mm
Axial Calibration on Each Disc	Left disc 120°~0°~135° Right disc 45°~180°~60°

Optical Trial Lens  
(Set Not Included)

## PD Adjustments

The K-0391 permits to adjust the PD, axis of the lens, frame length, and the position of the nose pad for a smooth measurement.

## Precise Positioning

K-0391 position of axis can be determined from the circular scale on both sides of the frame to adapt the frame to various shapes of patients head.
